

Privacy Policy

Jabber utilizes state-of-the-art security and end-to-end encryption to provide private messaging services to users worldwide (“Services”). Your messages are always encrypted, so they can never be shared or viewed by anyone but yourself and the intended recipients.

Information you provide

Solana wallet. You register a Solana wallet when setting up the app. This information is stored locally and encrypted.

Messages. Jabber cannot decrypt or otherwise access the content of your messages. Your message history is stored encrypted on the Solana blockchain.

Managing your information. You can manage your personal information in Jabber’s application Settings. For example, you can update your profile information or choose to enable a SOL fee for each message you receive.

No information is collected by Jabber. All the information is stored on the Solana blockchain and end to end encryption.
